

# Glass Panel Heating

Sophisticated heating in a class of it's own

## *EVERY DESIGNERS DREAM*

**NOBO** Safir is only 9mm thick and has a sophisticated simplicity. The range consists of three variants clear glass, mirror and polished black.

The **NOBO** Safir clear glass allows you to see through the heater, ideal to place in front of a window providing an uninterrupted external view. This variant is only available in horizontal version.

The stylish polished black gives a stunning effect, permitting many creative solutions in terms of use and location and is available in both horizontal and vertical formats.

The **NOBO** Safir mirror version, available in vertical only, is the perfect answer for halls, entrances and in particular providing a steam free mirror for bathrooms.

*Comfortable  
temperatures and a  
new look at the  
forefront of design  
technology*

# NOBO Glass Panel Heating

## Technical Information

Clear glass • horizontal • floor mounted

Mirror • vertical • wall mounted

Black • vertical • wall mounted

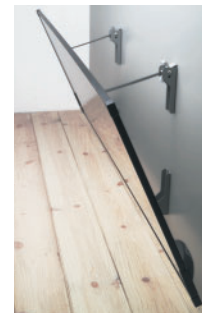

Black • horizontal • wall mounted

**NOBO Safir** is made from two 4mm glass sheets joined together. The front of the rear plate has an invisible electrically conducting layer. This emits the heat, while the temperature distributes evenly over the whole of the panel. The front plate acts as an electrical and mechanical protection.

### WALL MOUNTING

**NOBO Safir** can be wall mounted horizontally or vertically, using the appropriate brackets included. Easily dismantled for cleaning.

### FLOOR MOUNTING

**NOBO Safir** can be supplied with Legs for floor mounting; either single or back to back.

### CONTROL

**NOBO Safir** must be direct wired and controlled by a wall mounted thermostat, or other control system, e.g. a central operating control.

Orion EC512

Particularly suitable for control by the

**NOBO 51**,  
Orion EC512  
& **NOBO TR36**.

NOBO 51

NOBO TR36

### SAFETY CUT-OUT

**NOBO Safir's** resettable Safety Cut-Out, switches the heater off if anything is draped over it.

### ELECTRICAL CONNECTION & INSTALLATION

Installation must be carried out by an authorised installer.

	Model		Output Watts	Amps	Height	Length	Depth
GV 05-9-X	Vertical	MIRROR	1000	4.16	1400mm	500mm	55mm
GH 06-11-X	Horizontal	BLACK	1200	5.0	600mm	1400mm	55mm
GH 06-11-X	Horizontal	CLEAR	1200	5.0	600mm	1400mm	55mm
GH 06-11-X	Vertical	BLACK	1200	5.0	1400mm	600mm	55mm
